AM I REALLY LIKE THIS?

These "levels of being" are NON-physical* and exist outside our present concepts of space-time. It is only for conceptual purposes we visualize them as "bodies".

This portion of the individual is what is involved in out-of-the-body (astral) travel and most if not all psychic phenomena. It provides a rational basis for understanding sleep, anaesthesia, hypnosis, biofeedback, and the placebo effect. It is the source of most physical and mental illness, but properly understood can be utilized to create vibrant health and prolong life. This portion of the individual survives death of the physical and etheric bodies.
*Previously considered "involuntary", but now bio-feedback, self-hypnosis, autogenic training prayer and meditation techniques show that the conscious mind can readily function down to the cell level.
This drawing and the overleaf are from HEALERS AND THE HEALING PROCESS by G.W. Meek & 14 specialists from 6 countries. The drawings provide a basis for understanding all facets of holistic medicine as well as mental, physical and spiritual healing.

Our INTERPENETRATING non-physical world of "antimatter" and "negative" space-time.
Our physical world of matter and "positive" space-time.
* By NON-physical we refer to entities which, as of today, are outside our knowledge of the four basic forces recognized by physicists.
Everything in this diagram is immersed in a "sea" of all pervading energy which provides contact with everything else in the cosmos. In the past this energy has been referred to as ether, od, orgone, prana, psi-matter, ect. We are now beginning to think of it in terms of an all-pervading sea of consciousness

CNS—CENTRAL NERVOUS SYSTEM

Cerebrum	Telencephalon = cortex = new brain (self-awareness and control) Diencephalon = older brain, major relay system, thalamus, pineal gland, hypothalamus and pituitary gland.
Cerebellum	Balance and coordination of cortico-spinal motor nerves; orientation via coordination of visual cues and cues from semi-circular canals in ears.
Brain Stem	Pons and medulla oblongata. Major lower relay station. Arousal centers.
Spinal Cord	Reflex nerve arcs and liaison with ANS.

ANS—AUTONOMIC NERVOUS SYSTEM

Spinal links, under the overall control of the diencephalon (see above)
